

Prefab Container House Project Buyer's Pack

10 Things to Confirm Before Requesting a Quotation

Prepared by E-TOM Container House Manufacturer

Planning a workforce camp, site office, modular accommodation project or temporary facility? Use this checklist to prepare a clearer enquiry and receive a more useful initial recommendation.

1. Project Location

Confirm:

- Project country
- City or delivery port
- Final delivery location
- Site access conditions
- Local climate and ground conditions

The destination affects transport, materials, insulation and local compliance requirements.

2. Intended Use

Select the main application:

- Workforce accommodation
- Construction camp
- Site office
- Mining or energy project
- Dining hall or kitchen
- Toilet and shower building
- Clinic or classroom
- Storage or guard room
- Other project facility

3. Quantity and Capacity

Confirm:

- Number of units
- Number of occupants
- Required total floor area
- Number of rooms

- Number of bathrooms or shared facilities

Quantity and capacity are essential for layout, production planning and logistics estimation.

4. Suitable Product Type

Flat Pack / Assemble Container House

Suitable for repeatable layouts, efficient transportation and flexible site assembly.

Foldable Container House

Suitable for rapid deployment and projects where transport volume is important.

Expandable Container House

Suitable when a compact transport unit needs to become a larger usable room after delivery.

Corrugated Panel Container House

Suitable for economical, relocatable offices, accommodation and project facilities.

K-Type and Other Prefabricated Buildings

Suitable for larger camps, connected buildings and multi-room project layouts.

The best product depends on the project use, location, quantity, transport conditions and local requirements.

5. Layout Requirements

Prepare the following information:

- Required room types
- Room dimensions
- Single-storey or multi-storey layout
- Bedrooms, offices and common areas
- Toilets, showers and kitchens
- Doors and window preferences
- Furniture and interior finish

A simple sketch or floor plan can help suppliers understand the project faster.

6. Technical Requirements

Confirm whether the project requires:

- Wall and roof insulation
- Fire-resistance rating
- Wind-resistance or load-bearing calculations

- Heating, cooling or ventilation
- Special doors and windows
- Local electrical voltage and frequency
- Local socket and lighting standards
- Plumbing and sanitary equipment
- Furniture or appliances

Always confirm local building, fire and electrical requirements before production.

7. Transport and Installation

Ask the supplier:

- What is the packed size and shipping weight?
- How many units fit in one shipment?
- What equipment is needed for unloading?
- What foundation or site preparation is required?
- Are installation drawings included?
- Is remote or on-site installation support available?
- Are export and packing documents provided?

Provide the destination port and estimated quantity for a more realistic logistics discussion.

8. Quality and Documentation

Request information about:

- Steel structure and corrosion protection
- Wall and roof panel materials
- Insulation performance
- Fire and load-bearing documentation
- Factory inspection process
- Product testing and certificates
- Warranty terms
- Spare parts and after-sales support

Project requirements differ by country, so confirm which documents are required for your project.

9. Quotation Request Template

Copy and complete this message:

Hello, I am planning a modular building project in [country / city].

Intended use: [workforce accommodation / site office / camp / other]

Estimated quantity: [number of units or total area]

Number of occupants: [number]

Required layout: [brief description]

Target delivery date: [date]

Technical requirements: [insulation / fire / electrical / other]

Installation support required: [Yes / No]

Please recommend a suitable product type and advise what information is needed for an initial quotation.

10. Request a Project Recommendation

Send E-TOM these four details to start a project discussion:

- Project country
- Intended use
- Estimated quantity
- Target delivery date

Website: etomhousing.com

Email: sales@etomhousing.com

WhatsApp / Phone: +86 19872703231

Final Buyer Checklist

Before sending your enquiry, confirm that you have:

- Project country and delivery location
- Intended use
- Estimated quantity or total area
- Number of occupants
- Required layout
- Target delivery date
- Insulation and fire requirements
- Local electrical requirements
- Installation support requirements

A complete project brief helps suppliers provide a more useful recommendation and quotation.
